Lab4-Development

Lab 4: (2-3 Days)

Review new code (Frontend – Workflow)

Review the code in new modules

1. Get the code (if you don't have it yet, talk to someone)
2. Checkout several modules such as:
   a. VSVendorDetails
   b. VSMyOfficesDashboard
   c. VSReportCenter
   d. VSPayment
3. Review the UI
4. Review the workflow until the database
5. Review database structure, tables, stored procedures

Questions

1. Identify the main characteristic of using this code and how it works on the website
2. Do a quick diagram of the flow (UI, WCF, DB, Sproc)
3. Name the most common databases and endpoint for each module
4. Did you have any problem during the review? Do you find some bugs or issues? Do you have some suggestions?
5. Which are the main differences between the old and the new implementations?
